

Droughts

Famine

Health

Pollution

Ecosystem degradation:
We are denuding and poisoning the ecosystems upon which life depends.
Once we recognize this, the solution becomes apparent. Ecosystem Restoration!

EcoRestorationAlliance.net:
It's going to take "almost everyone, almost everywhere",
and we don't have much time. Put your pin on the BigMapToSaveTheFuture.net

The screenshot shows the BigMapToSaveTheFuture.net website. At the top, there's a navigation bar with a search icon, a "Nominate new entries" button, the ERA logo, the text "Big Map to Save the Future", and a "Donate to help make it happen!" button. Below the navigation bar, there's a search bar with the text "Search in Name, Description, Location". To the left of the map, there's a list of nominated entries, each with a rainbow flag icon and a location name. In the center, there's a panel with the text "These people and places are saving the future! (You should be here too.)", followed by "How to..." instructions: "Select an item to see details. (Deselect to see this message).", "Click on this panel to zoom in on the featured item.", and "To learn more, visit EcoRestorationAlliance.net". On the right, there's a map of the world with a "Map" button and a "Globe" button. The map shows a large number of pins, mostly in North and South America, representing nominated locations.
